10,000 m³ of concrete production before the first Service

Jan Kjeller is the CEO of ByggBröderna Construction in Sweden. He was promised the first service would not be required until the machine had produced 5,000 m³ of concrete.

"I made a lot of money with my first small machine, I decided to go for a bigger machine to make more money".

Jan Kjeller CEO

Fibo concrete batching plants are designed and built to a very high standard.

Our machines are designed to last more than fifteen years – this insures a very high return on your investment.

A Fibo batching plant has a dosing accuracy of +-3% for standard machines and +-1% for our pre-weighing machines. We can deliver high-quality concrete to BS 8500 and EN 206.

**Henrik Jeppesen CEO
Fibo Intercon**

Jan with his old machine talking to Henrik Jeppesen CEO Fibo Intercon

We Broke our Promise

The first service was double this number. The only replacement was the paddles in the mixer drum. Our engineers accessed the onboard computer to get the full production data. The machine had produced 10,000 m³ of concrete over the five year period Jan had the machine.

Jan was so pleased with the money he was making from his first C1800 20m³/hr machine, he decided to invest in a F2200 45m³/hr machine.

The NEW Machine

Jan is going to put the new F2200 batching plant into a building and supply local contractors with high-quality concrete.

On a standard eight hour shift with the machine working for eight hours, it can produce 320m³ of concrete per day.

Jan is also looking at recycled and cement replacement mixes to further reduce the cost. With four bins the F2200 is capable of mixing these types of recipes as well as all the standard coded mixes.

Jan with his new F2200 machine

The OLD Machine

Jan is going to use his C1800 refurbished machine to produce high quality concrete to his sites. The C1800 is very good for delivering concrete to the following construction projects.

House Building

Slip form projects

Large continuous pours

Inner city projects

Large precast projects - sea defences for example

Recycled concrete production

Concrete lego block production

Concrete cost reduction due to improved logistics

High Quality Low Cost Concrete

Learn how to manufacture high quality low input cost concrete.

High Quality Concrete Batching Plants

We supply a large of high quality concrete batching plant with a dosing accuracy of $\pm 3\%$ for standard machines and $\pm 1\%$ for our pre-weighing machines. Mobile, semil mobile and fixed installations to your requirements. Below you can see a small selection of our standard machines.

Mini VIKING Semi-mobile Concrete Batching Plant

This compact, semi-mobile batching plant has a capacity of 4-5 M³/h.

Profit Potential £1,000 per day

B1200

Compact, mobile batching plant assembled on a joint twin-axle bogie trailer. Capacity between 10-16 M³/h.

Profit Potential £3,000 per day

M2200

Mobile batching plant assembled on a joint triple-axle bogie trailer with turn able front axle. Capacity between 25-45 M³/h.

Profit Potential £9,000 per day

T2200

Mobile batching plant assembled on a common twin-axle step frame semi trailer. Capacity between 25-60 M³/h.

Profit Potential £12,000 per day

Horizontal & Vertical Silos

Fibo intercon supplies big bag silos as well as vertical and horizontal cement silos. We can supply standard and customised solutions.
